

Con Edison Prepares for Winter Storm

March 16, 2007

NEW YORK, NY, Mar 16, 2007 (MARKET WIRE via COMTEX News Network) -- Con Edison is closely monitoring today's snow and ice storm and will have crews working around the clock this weekend to respond to any service problems that may occur.

Heavy snow, ice and wind can take their toll on trees that damage power lines. In addition, the company will maintain close contact with the New York City Office of Emergency Management and the Westchester County Office of Disaster and Emergency Service to coordinate storm response as necessary.

Con Edison offers the following tips to prepare for a storm:

- If you see downed electrical wires, do not go near them. Treat all downed wires as if they are live. Never attempt to move or touch them with any object. Be mindful that downed wires can be hidden from view by snow, tree limbs, leaves or water. Report all downed wires to Con Edison and your local police department immediately. If a power line falls on your car while you're in it, stay inside the vehicle and wait for emergency personnel.
- If your power goes out, turn off all lights and appliances to prevent overloaded circuits when power is restored. To report a power interruption at your home, call Con Edison's toll-free customer service number 1-800-75-CON ED (1-800-752-6633), or you may report a service problem on-line at www.coned.com. When reporting an outage, have your Con Edison account number available, if possible, and report whether your neighbors have also lost power. Leave at least one light switch in the on position to alert you when power has been restored.
- Check to make sure your flashlights and any battery-operated radios or televisions are in working order. Use candles and oil lamps with care. Also, make sure you have a supply of extra batteries. Weather updates and news on restorations of electrical service can be heard on most local radio and television stations.
- Avoid opening your freezer to see if food is still frozen. Every time you open the door, room-temperature air enters and speeds the thawing process. Most fully loaded freezers will keep food frozen for approximately 36 to 48 hours; half-full freezers will keep food frozen for approximately 24 hours.

Con Edison (NYSE: ED) is a subsidiary of Consolidated Edison, Inc., one of the nation's largest investor-owned energy companies, with approximately \$12 billion in annual revenues and \$27 billion in assets. The utility provides electric, gas and steam service to more than three million customers in New York City and Westchester County, New York. For additional financial, operations and customer service information, visit Con Edison's web site at www.coned.com.
