

Con Edison, Inc.

August 8, 2013

Goldman Sachs 12th
Annual Power and Utility
Conference

Forward-Looking Statements

This presentation includes certain forward-looking statements intended to qualify for safe-harbor provisions of the Federal securities laws. Forward-looking statements are statements of future expectation and not facts. Words such as "expects," "estimates," "anticipates," "intends," "believes," "plans," "will" and similar expressions identify forward-looking statements. Forward-looking statements are based on information available at the time the statements are made, and accordingly speak only as of that time. Actual results might differ materially from those included in the forward-looking statements because of various factors including, but not limited to, those discussed in reports the company has filed with the Securities and Exchange Commission.

Non-GAAP Financial Measure

This presentation contains a financial measure, earnings from ongoing operations, not determined in accordance with Generally Accepted Accounting Principles (GAAP). Earnings from ongoing operations should not be considered as an alternative to net income. Management uses this non-GAAP measure to facilitate the analysis of the company's ongoing performance and believes that this non-GAAP measure also is useful and meaningful to investors. A reconciliation of this non-GAAP measure to earnings determined in accordance with GAAP is included as a part of this presentation.

Regulated Transmission and Distribution Focused

*Total reflects parent company expenses and consolidation adjustments amounting to \$(0.06) per share. Earnings include after-tax net mark-to-market gains of \$0.13.

Regulated Utilities are the Core of Con Edison, Inc.

Con Edison of New York (CECONY)

- 3.3 million electric customers
- 1.1 million gas customers
- 1,717 steam customers
- 706 MW of regulated generation
- Delivered 40% of NYS 2012 electric peak consumption

Orange and Rockland (O&R)

- 303,000 electric customers
- 131,000 gas customers
- Delivered 3.4% of NYS 2012 electric peak consumption

New York City Economy Continues to Show Resilience

- Employment growth continues with 80,000 jobs added in 2012 and 150,000 jobs added over the past two years
- NYC is becoming a high-tech hub with job growth and two science campuses under development
- Tourism now stands as NYC's fifth largest industry with a record-breaking 52 million tourists in 2012

With projects underway like One World Trade Center, nearly half the nation's office space under construction is in NYC

In December, ground was broken on a 26-acre, \$15 billion Hudson Yards development

- Municipal projects like the 2nd Avenue Subway and the 7-Line Extension to the Jacobs Javits Center will help to serve NYC's growing population
- Barclays Center – home of the Nets and Islanders - officially opened in September 2012 in Downtown Brooklyn

LILO Developments

- **In January 2013**, the US Court of Appeals for the Federal Circuit ruling reversed an 2009 court order and disallowed company-claimed tax deductions relating to a 1997 LILLO transaction
- **In March 2013**, the Court of Appeals denied the company's request to grant rehearing *en banc* of the January 2013 decision. To company decided not to file an appeal with the Supreme Court of the United States.
- **Cash Impact:**
 - In January, the company made a \$447 million deposit with federal and state agencies primarily related to the potential tax liability from all LILLO transactions and interest thereon; in June, at the company's request the IRS returned \$95 million of the deposit
 - In June, the company terminated the 1999 LILLO transaction and received net cash proceeds of \$108 million
 - If the management were to negotiate the termination of the second LILLO transaction, the estimated cash proceeds would be approximately \$90 million (pre-tax)
- **Income Statement Impact:** No earnings contribution in either 2012 or 2011
 - \$150 million (\$0.51 per share) of after-tax charge related to the transactions recorded in 1Q13 as a result of the January Court of Appeals decision
 - \$29 million (\$0.10 per share) of after-tax gain recorded related to the termination of the 1999 LILLO transaction in June

Commissioners

PSC Staff

- Annual budget: \$80 million; Staffing: 460 employees
- Regulates: Electric (7 companies), Gas (10), Water (300), Telecom (5), Cable (30)

Features of New York Regulation

- Forward-looking test year for expenses and rate base
- True-ups for major expenses:
 - Fuel and power cost recovery (most)
 - Pensions and Other Post-employment Benefits
 - Property taxes (partial)
 - Environmental clean-up costs
 - Interest on long-term borrowing
- Revenue decoupling
- Performance penalties
- Formulaic approach to setting ROE's

NY PSC's Formulaic Approach to ROE

Rate of return on equity

2/3 Discounted Cash Flow model
+
1/3 Capital Asset Pricing model

NY PSC Staff's Discounted Cash Flow Model

- The Staff employs a dividend discount model.

$$\text{Value} = \frac{D_1}{(1+R)} + \frac{D_2}{(1+R)^2} + \frac{D_3}{(1+R)^3} + \dots$$

- Solving for an equity return, R, where:
 - D_1 through D_4 = Value Line estimates
 - D_5 through D_∞ = Value Line estimates based on future earnings retention and share growth
 - Value = average of prior three monthly high and low proxy group stock prices

NY PSC Staff's Capital Asset Pricing Model

- Staff solves for an equity return, R

$$R = R_{UST} + (R_{MKT} - R_{UST}) * \beta$$

- Where:
 - R_{UST} is the risk-free return: average of prior three monthly yields for 10-year and 30-year Treasuries
 - R_{MKT} is the market rate of return: BOfA Merrill Lynch's monthly *Quantitative Profiles* report (three month average)
 - β is the risk of the individual share relative to that of the market: Value Line estimate for peer group

Summary of Rate Plans — Footnotes

(continued)

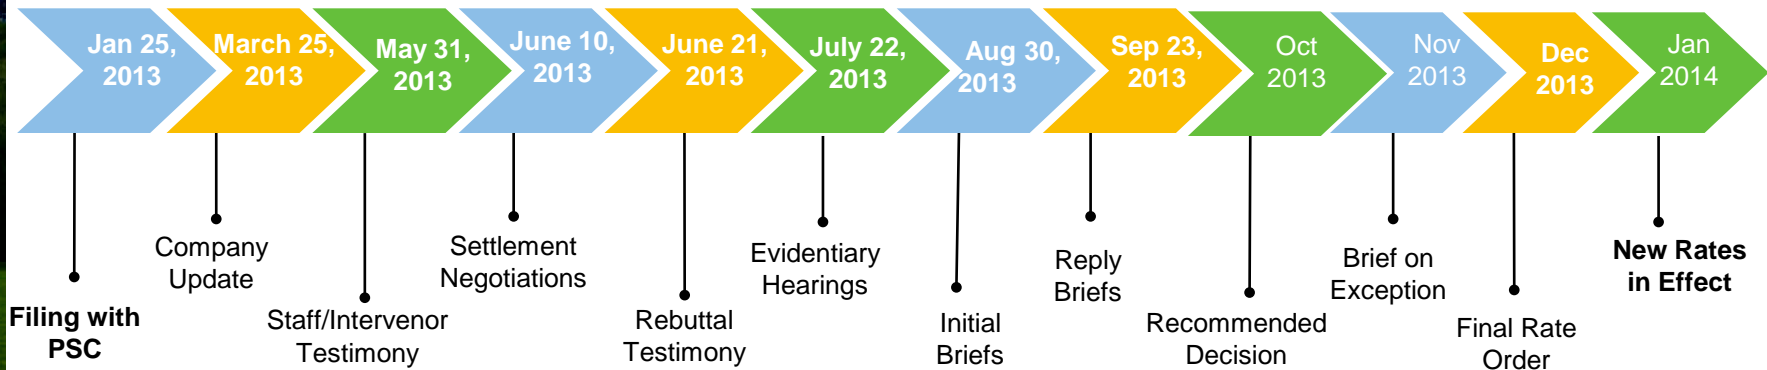

- (a) Subject to limitation for cost reconciliation described in Note B to the financial statements in Item 8.
- (b) Pursuant to NYSPSC orders, a portion of the company's revenues is being collected subject to refund. See "Other Regulatory Matters" in note B to the financial statements in item 8.
- (c) Temporary increase of \$133.5 million scheduled to go into effect April 1, 2012 was eliminated by the application of available credits of \$133.5 million (see Case 12-E-0008).
- (d) In Yr. 2 and 3, 10.65% - 12.149%: 40/60, 12.15% - 13.149%: 25/75, and >13.15%: 10/90
- (e) In Yr. 2 and 3, 10.10% - 11.59%: 40/60, 11.60% - 12.59%: 25/75, and >12.60%: 10/90
- (f) The rate plan provides for a one-time surcharge of \$31.7 million in Year 3
- (g) in Yr. 2, 10.31% - 11.30%: 50/50, 11.31% - 12.30%: 25/75, and >12.30%: 10/90. In Yr. 3, 10.41% - 11.40%: 50/50, 11.41% - 12.40%: 25/75, and >12.40%: 10/90
- (h) The rate plan provides for a one-time surcharge of \$4.3 million in Year 3

Con Edison of New York

2013 Electric, Gas and Steam Rate Filings

(13-E-0030, 13-G-0031, 13-S-0032)

- Filed on January 25, 2013
- Historic test year: Twelve months ended June 30, 2012
- Forward test year: January 1, 2014 – December 31, 2014
- New rates in effect January 1, 2014
- Timeline for rate setting process:

Con Edison of New York

Key Provisions of 2013 Electric, Steam and Gas Rate Filing

- Proposing programs intended to reduce service outages from major storms, as well as improve the storm recovery process
 - plans for \$1 billion of storm hardening capital expenditures through 2016 (electric: \$800 million; gas: \$100 million; steam \$100 million)
 - surcharge mechanism for future hardening programs.
- Proposing additional operating and capital programs, including programs to address new cyber security standards
- Proposing to recover deferred storm charges over three years (including \$243 million of response and restoration O&M costs for Sandy)
- Requesting the implementation of a storm reserve for the gas and steam systems
- Continuing the current provisions for true up of costs of pension and OPEBs, long-term debt, storms (electric), the impact of new laws, and environmental site investigation and remediation
- Continuing the revenue decoupling mechanism for electric and gas services
- Proposing implementation of weather normalization of revenues for steam
- Continuing provisions for recovery of cost of purchased power, gas, steam and fuel
- Requesting full reconciliation of property taxes and municipal infrastructure support costs

System Hardening and Other Improvements

Strategies identified based on recent experience, as well as our understanding of preliminary recommendations made by new commissions established by NY Governor Cuomo following Superstorm Sandy. Our plans include:

- Strategic undergrounding and flood protection projects, including flood walls for certain electric and steam equipment
- Raising critical equipment in light of higher potential flood levels
- Upgrading gas system equipment
- Accelerating installation of submersible equipment, where appropriate
- Smart grid technology to improve flexibility of the electric distribution system, and
- Adoption of new cyber security standards

Market for Multi-Family* and Commercial Oil-to-Gas Conversions by Oil Type

January 2011 to June 2013

* Multi-family buildings include 5 or more families

** Conversions of #2 oil burners rated 350,000 BTUs or higher

Annual Multi-Family* and Commercial Oil-to-Gas Conversions by Oil Type

2013 figures through June 30

Number of gas service installations

* Multi-family buildings include 5 or more families

** Includes conversions of #2 oil burners rated 350,000 BTUs or higher

NY Energy Highway: Blueprint issued in October 2012

NY Public Service Commission response to Blueprint:

- **Proceeding to examine proposals for AC transmission upgrades and new transmission lines to address congestion on the transmission system between Utica and NYC (12-T-0502)**
 - 16 projects proposed by various parties
 - NY Transco filed a statement of intent proposing to build five projects valued at \$1.3 billion. Expected in-service time is between 2016 and 2019. For more information visit <http://www.nytransco.com/>
 - The PSC held technical conferences on May 14th, June 17th to discuss the process with potential applicants and other interested parties
 - DPS Staff held a technical conference on August 1st to explain their Straw Proposal on cost allocation and recovery; comments are due on August 26th
 - The PSC will initiate a single Article VII process to consider the proposed projects. Application materials for the projects need to be submitted by 10/1/2013

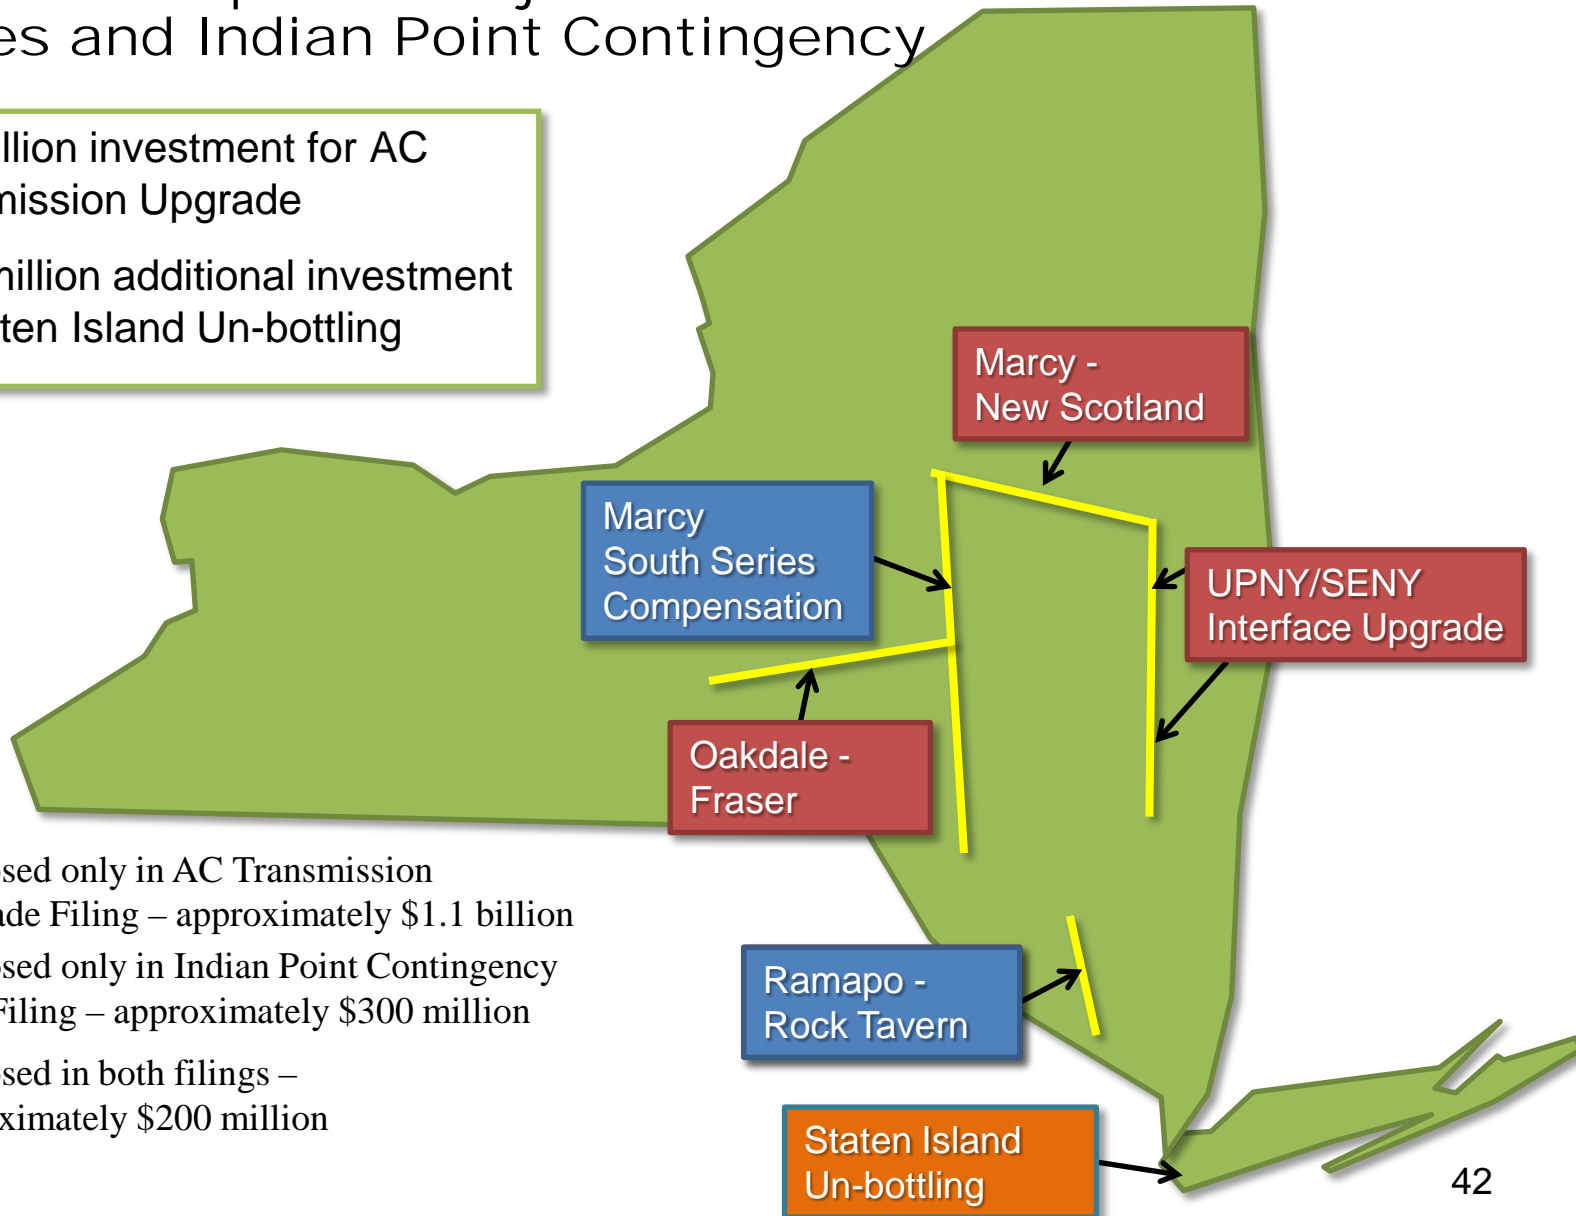

NY Energy Highway: Blueprint issued in October 2012 (cont.)

NY Public Service Commission response to Blueprint:

- **Proceeding soliciting Indian Point Contingency Plan (12-E-0503) – filed by ConEd and NYPA on February 1st**
 - The plan contemplates two parallel solution paths: a) Transmission Owner Transmission Solutions (TOTS) - three transmission projects (NY Transco projects) and b) an RFP process initiated by NYPA to consider generation and/or transmission alternatives proposed by private firms
 - In March, the PSC approved the RFP process; NYPA announced the RFP in early April
 - In April, the PSC authorized the TOTS proposal to move forward with a cap of \$10 million by September 2013 – primarily for engineering design and licensing
 - DPS Staff held a technical conference on June 21st to explain their Straw Proposal on cost allocation and recovery; comments were due on July 22nd
 - The PSC is expected to act on a portfolio of projects in September 2013

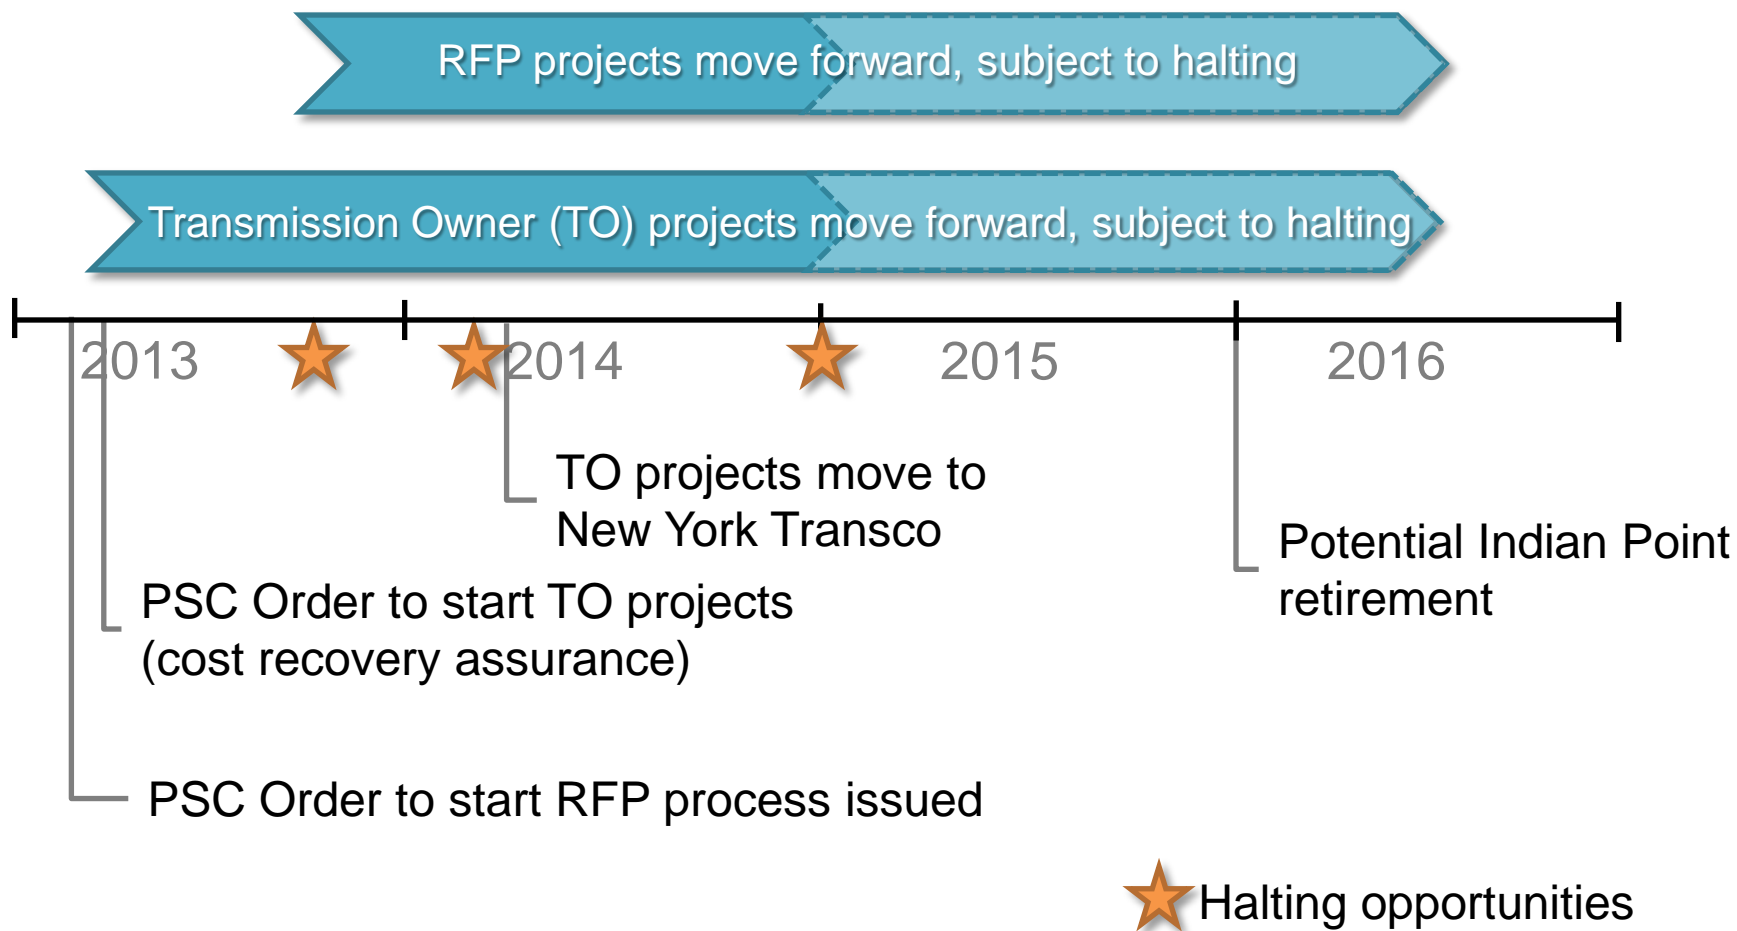

NY Transco Proposed Projects for AC Transmission Upgrades and Indian Point Contingency

- \$1.3 billion investment for AC Transmission Upgrade
- \$300 million additional investment for Staten Island Un-bottling

- Proposed only in AC Transmission Upgrade Filing – approximately \$1.1 billion
- Proposed only in Indian Point Contingency Plan Filing – approximately \$300 million
- Proposed in both filings – approximately \$200 million

Proposed Timeline for Indian Point Contingency Plan

A Compelling Dividend Record: 39 Consecutive Years of Dividend Increases

Annualized Dividend 1975 - 2013

Dividend Payout Ratio

Consolidated Edison, Inc. Investment Thesis

- The largest of the few publicly-traded, T&D-focused utility companies
 - Limited commodity exposure
- Reduced regulatory lag
 - Forward-looking test years
 - Timely recovery of most fuel and commodity costs
 - Revenue decoupling mechanism in NY (electric and gas)
 - Adjustment mechanisms for several major uncontrollable expenses (e.g. pension)
- Significant dividend record
 - 39 consecutive years of dividend increases; 3rd longest in electric utility industry
 - 4.1% yield is 3rd highest among S&P 500 Dividend Aristocrats
- Ability to invest for customer benefit
 - Majority of investment is replacement and upgrade of existing assets
 - Growth opportunity through increased natural-gas conversions
 - Targeted energy efficiency and demand side management
 - Strong, stable balance sheet and conservatively managed liquidity
